

Jonash Bundalian

Build Technology Consultant / Low Voltage Designer / Cloud Architect

Summary

Jonash joined Breen Design Group in 2016 as a computer engineer in the Electrical department, focusing on low-voltage projects. With a bachelor's degree in computer engineering and specialized training in Cisco technology, Jonash has extensive experience in network consulting and low-voltage design for high-rise buildings, hospitals, commercial properties, residential developments, and schools (LACCD, LESD, MVSD, LNSD, and LAUSD).

Over the past decade, he has also contributed to various aerospace projects across southern California and hundreds of affordable housing projects of Breen Design Group.

In addition to his role as a Low Voltage Designer, Jonash serves as an in-house Solutions Cloud Architect utilizing Amazon Web Services and acts as a technology consultant for Breen Design Group's clients.

Education

Holy Angel University, Angeles City, Philippines

2015

B.S. in Computer Engineering
